About Us

Welcome to S&S Packaging — a third-generation printing and packaging company with roots dating back to 1965. Originally founded as Friends Printery, we evolved into S&S Packaging in 1997 under the leadership of Mr. Jaideep Savla.

Over the past two decades, we've built a strong presence in the cigarette packaging industry, both in India and internationally. Today, under the leadership of Mr. Siddhant Savla, we are in a phase of strategic growth — expanding our team, enhancing our capabilities, and diversifying into FMCG, stationery, nutraceuticals, textiles, and pharmaceuticals.

Our 50,000+ sq. ft. manufacturing facility in Silvassa is equipped with state-of-the-art machinery, enabling us to deliver consistent, high-quality packaging solutions at scale. Over the last two decades we have built strong client relationships with prestigious brands like Godfrey philips, VST, Al Wahdania, Bommidala, NTC, Intertabac, PCMK, Ora Tobacco, Achakzai, Doms stationery, Maped, Accuwrite, MJ Biopharm, Meredien Pharma etc.

At S&S Packaging, Quality, Innovation, Reliability, and Customer Satisfaction are the cornerstones of everything we do. We are more than just a packaging company — we're a family business built on legacy, committed to excellence, and driven by purpose.

S&S Packaging — crafting quality, driven by legacy, growing with purpose.

Our Infrastructure

[More Info](#)

1. Offset Division

Our Offset Printing Division leverages advanced technology to deliver superior print quality and precision. Committed to excellence, we ensure vibrant colors and sharp details in every project, meeting the highest industry standards.

2. Rotogravure Division

Our Rotogravure Printing and Slitting Machines Division specializes in high-speed, efficient production, delivering consistent quality and precision for various substrates. With cutting-edge technology, we ensure sharp imagery and seamless slitting for optimal packaging solutions.

3. Quality Assurance Laboratory Equipment

At S&S Packaging, we prioritize quality to bring your vision to life and ensure your brand's success. Our state-of-the-art in-house QA lab tests your product at every stage, consistently exceeding expectations.

Offset Division

The Bobst Novacut 106 E 3.0 is a state-of-the-art die-cutting and embossing machine, ideal for processing various types of packaging boards. This machine can handle up to 8,000 sheets per hour and is capable of processing solid boards up to 300 gsm. We use Marbach(Germany) dies for die cutting.

The Heidelberg Speedmaster is a high-performance offset printing machine capable of printing six colors in a single pass, enhancing the standard CMYK process with two additional colors or finishes. It supports paper weights from 40 to 400 gsm and operates at speeds of up to 12,000 sheets per hour, making it ideal for producing complex and vibrant prints.

Offset Division

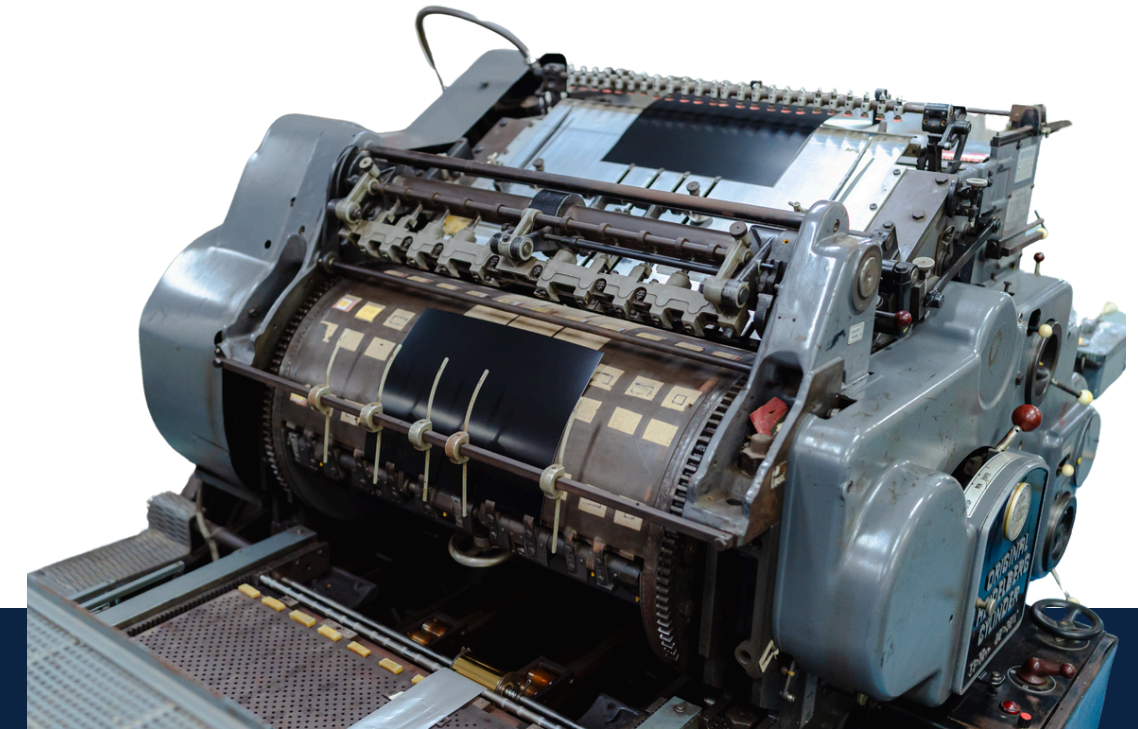

Folder and Gluer Machine

Forms and glues folder cardboard and other materials, providing pre-folding and gluing for mono cartons to meet all our customer requirements.

Cutting Machine

Cuts various materials, like sheets, with high precision in order to provide it a uniform and desired shape.

Heidelberg Foiling Machine

Specialized for adding decorative and protective foil elements to printed materials with precision, including holographic films for secure packaging.

Rotogravure Division

Kohli 6-Color Printing Machine delivers 200 m/min high-speed printing on 20-350 gsm paper with precision controls. It is capable of printing with six different inks. Renowned for its precision and efficiency, this machine can handle a wide range of substrates, including flexible packaging materials.

The Goebel slitting machine operates by unwinding large rolls of material, which are then passed through a series of razor-sharp blades or rotary cutters. These blades meticulously slice the material into narrower strips or rolls, ensuring clean, accurate cuts every time.

Rotogravure Division

SJT-600ST Two-Color Stamping Machine offers precise hot foil stamping with a 600mm width and $\pm 0.10\text{mm}$ accuracy for consistent cigarette packaging.

GDFJ-100A High-Speed Rewinder rewinds substrates at up to 450 m/min with a 500mm diameter for high-quality cigarette packaging.

Rotogravure Division

The Sud and Warren Slitter and Rewinder offers high-speed, precise slitting and rewinding for various substrates.

SPQ-800SS Double-Shaft Slitter slits paper substrates at 450 m/min with $\leq \pm 0.05\text{mm}$ accuracy and supports 1000mm rolls.

Quality Assurance Lab

[More Info](#)

- Scuff Tester: Evaluates scuff resistance by applying pressure or friction to materials to see how they withstand scratches or scuffing.
- COBB Tester (Water Absorption Test): Tests water absorption levels to check material water resistance by measuring weight increase after exposure to water.
- Ford Cup/Viscosity Tester: Assesses the thickness (viscosity) of printing inks for quality control.
- Weighing Scale GSM Test: Measures the weight of paper or sheet materials in grams per square meter (GSM).
- Coefficient of Friction Tester: Tests water absorption levels to check material water resistance by measuring weight increase after exposure to water.
- Stiffness & Crease Tester: Measures the force required to bend or crease materials, ensuring packaging maintains structural integrity during handling and storage.
